

Launton Support Group update

21st April 2022

The support group is still maintaining a presence on Facebook and currently has 238 members.

The Facebook group has had very little activity in the past year. However, we frequently hear of neighbours looking out for neighbours, continuing the approach fostered in the height of the Covid pandemic. Expanding an approach that was already adopted in many parts of the village even before the challenges of Covid.

We current accommodate requests from local external bodies when trying to recruit volunteers. These could be for other, technology based groups or for drivers.

Back in December the group supported people in the village with Covid, collecting food and medication and assisted some during the power outage this spring with alternative cooking tools.

As ever, we are grateful to Launton Lines for including the groups details and how to contact us, this is especially helpful with so many new families joining our community.

It is our intention to maintain the group as is for the coming year. We are on hand for anyone in the village needing support, not just for Covid related assistance.

Thanks to all the good neighbours that make this possible and the support of the Parish Council.

Janice Hawes
